Department of Defense Announces Basic Research Awards

The Department of Defense today announced 15 awards to academic institutions to perform multidisciplinary basic research. The awards, totaling $105 million, are the result of the fiscal year 2013 competition conducted by the Army Research Office and the Office of Naval Research under the DoD Multidisciplinary University Research Initiative (MURI) Program.

The MURI program supports research by teams of investigators that intersect several traditional science and engineering disciplines in order to accelerate research progress. Most of the program’s efforts involve researchers from multiple academic institutions and academic departments. Based on the proposals selected in the fiscal 2013 competition, a total of 43 academic institutions are expected to participate in these 15 research efforts.

The highly competitive MURI program complements other DoD basic research efforts that support traditional, single-investigator university research grants by supporting multidisciplinary teams with larger and longer awards, in carefully chosen research topics identified for their potential for significant and sustained progress. As with single investigator awards, MURI awards provide strong support for the education and training of graduate students in new, cutting edge research.

Over the past 25 years, DoD’s MURI program has produced significant capabilities for U.S. military forces and opened up entirely new lines of research. Examples include advances in laser frequency combs that have become the gold standard in frequency control for precision in navigation and targeting; atomic and molecular self-assembly projects that have opened new possibilities for nano-manufacturing; and the field of spintronics that emerged from a MURI award on magnetic materials and devices. DoD’s strategy to quickly leverage the basic research advances in MURI awards for new capabilities has focused on early engagement with industry.

Army Research Office and the Office of Naval Research solicited proposals in 16 topics important to the Department and received a total of 193 white papers, which were followed by 43 proposals. The awards were selected based on merit review by a panel of experts and are subject to successful negotiation between the institution and DoD. The awards announced today are for a five year period subject to availability of appropriations and satisfactory research progress. Awards in six topic areas of interest to the Air Force will be announced at a later date.

The list of projects selected for fiscal 2013 funding may be found at the Defense Innovation Marketplace (www.DefenseInnovationMarketplace.mil) website.
### MURI Topic: Random Lasers, Nano-Spasers, and Optical Rogue Waves

| ONR | Novel Nonlinear Optical Processes in Active, Random and Nanostructured Systems | Georgia State University | Mark Stockman | GA
|     | Purdue University | University of Central Florida | CA
|     | University of California at Berkeley | Yale University | IN
|     | Cornell University | | FL

### MURI Topic: Free Space Optical Quantum Key Distribution (QKD)

| ONR | Fundamental Research on Wavelength-Agile High-rate Quantum Key Distribution (QKD) in a Marine Environment | University of Illinois at Urbana-Champaign | Paul Kwiat | IL
|     | Duke University | University of Arizona | NC
|     | Boston University | | AZ

### MURI Topic: Integrated Nanophotonics

| ONR | Near-Field Nanophotonics for Energy Efficient Computing and Communication (NECom) | University of California at San Diego | Yeshaiahu Fainman | CA
|     | Duke University | University of California at Los Angeles | CA
|     | University of California at Berkeley | University of Arizona | CA

### MURI Topic: Exploitation of Natural and Anthropogenic Noise for Ocean Exploration

| ONR | The Information Content of Ocean Noise: Theory and Experiment | University of California at San Diego | William Kuperman | CA
|     | Duke University | Georgia Institute of Technology | NC
|     | Massachusetts Institute of Technology | Portland State University | GA
|     | | | MA
|     | | | OR
### MURI Topic: Rare Element Replacement Strategies

Brigham Young University
University of North Texas
Central Michigan University
University of Maryland, College Park | Stefano Curtarolo | NC UT TX MI MD |

### MURI Topic: Acoustic Metamaterials

| ONR | Expanding the Limits of Acoustic Metamaterials | Duke University
Rutgers University
University of California at Berkeley
Massachusetts Institute of Technology
University of Texas at Austin | Stephen Cummer | NC NJ CA MA TX |

### MURI Topic: Cognitive Neuroscience of Memory Consolidation across Sleep Stages and Efficiency Learning

| ONR | Memory Consolidation during Sleep in Humans, Rodents and Computational Models | University of California at Riverside
University of Arizona
Harvard University Medical School
University of California at San Diego | Maksim Bazhenov | CA AZ MA CA |

### MURI Topic: Computational Foundations of Moral Cognition

| ONR | Moral Competence in Computational Architectures for Robots: Foundations, Implementations and Demonstrations | Tufts University
Brown University
Rensselaer Polytechnic Institute
Georgetown University
Yale University | Matthias Scheutz | MA RI NY DC CT |
## MURI Topic: Artificial Cells for Novel Synthetic Biology Chassis

| ARO | Dynamic Artificial Cells Composed of Synthetic Biorthogonal Membranes | University of California at San Diego  
Harvard University  
University of Colorado | Neal Devaraj | CA  
MA  
CO |

## MURI Topic: Molecular Co-Crystal Design and Synthesis

Kansas State University  
Georgia Institute of Technology  
Purdue University  
University of Delaware  
New York University | Adam Matzger | MI  
KS  
GA  
IN  
DE  
NY |

## MURI Topic: Reduced Cyber-System Signature Observability by Intelligent and Stochastic Adaptation

| ARO | Adversarial and Uncertain Reasoning for Adaptive Cyber Defense: Building the Scientific Foundation | George Mason University  
Dartmouth College  
Pennsylvania State University  
University of Michigan | Sushil Jajodia | VA  
NH  
PA  
MI |
